EDUCATION

Pandit Deendayal Energy University

Bachelor of Technology(B. Tech) in Computer Science and Engineering(CSE)

July 2023 – May 2027

GPA: 9.06 / 10

WORK EXPERIENCE

Freelance Software Developer

June 2024 – December 2024

Copilot Data Solutions, Pennsylvania, USA (Remote)

- Developed a natural language interface enabling customers to interact with internal back-office software systems.
- Implemented backend logic to process user queries and translate them into structured operations compatible with enterprise workflows.
- Collaborated remotely to design features, integrate system components, and deliver maintainable production-ready code.

PROJECTS

H2Cred – Hydrogen Credit Registry dApp

github.com/veer-mehta/h2cred

React.js, TypeScript, Solidity, Ethereum (Sepolia), Ethers.js, MetaMask

- Engineered and deployed Solidity smart contracts enabling on-chain issuance and trustless ownership transfer of hydrogen credits.
- Integrated a Web3-enabled frontend with MetaMask for secure transaction signing and blockchain interaction.
- Designed contract storage and event logging mechanisms supporting transparent transaction tracking and off-chain indexing.

2D Shooting Game in 8086 Assembly

github.com/veer-mehta/asm-game

Assembly, MASM 8086, DOSBox

- Developed a 2D shooting game in MASM assembly featuring player movement, projectile mechanics, and collision detection.
- Implemented graphics rendering by directly manipulating video memory buffers within the DOS graphics environment.
- Handled keyboard input through hardware interrupts and optimized the main game loop for efficient execution.

Self-Hosted Linux Server & Secure Remote Access

Linux, Docker, WireGuard VPN, Dynamic DNS

- Repurposed existing hardware to deploy a self-hosted Linux server for file storage, application hosting, and network services.
- Configured containerized services using Docker to support NAS functionality and persistent service deployment.
- Established secure remote connectivity through WireGuard VPN and dynamic DNS for encrypted access across networks.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, C, C++, Java
Web & Backend	React.js, Next.js, Node.js, Flask
Blockchain	Solidity, Ethereum, Ethers.js, Hardhat
Databases	PostgreSQL, MySQL, MongoDB
DevOps & Tools	Linux, Docker, Git, WireGuard, Postman
Game Dev	Unity, Phaser.js, PyGame
